AREVON.

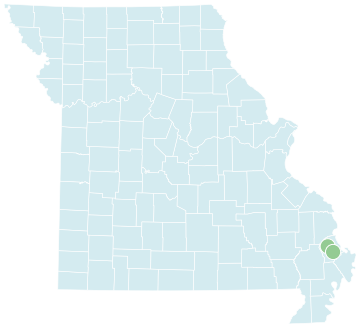

Missouri

Powering America. Strengthening Communities.

State Overview

Arevon is actively expanding its portfolio in the Midwestern region of the United States and is focused on bringing more energy and economic benefits to Missouri.

Our projects in Missouri are designed to deliver affordable, reliable power while creating local jobs and strengthening communities. By partnering with landowners, local governments, and other area stakeholders, Arevon ensures that each project aligns with regional priorities and reflects the values of the communities it serves.

Prioritizing Safety

Safety is Arevon's top priority at every solar and energy storage project we develop, construct, own, and operate. Arevon upholds the highest safety standards, provides ongoing training, and fosters a culture of vigilance — ensuring the well-being of our staff, contractors, and host communities.

Strengthening Communities

At Arevon, we don't just develop energy projects — we show up, we listen, and we act as responsible partners to the communities that make them possible. That means more than delivering electricity. It means supporting local priorities through volunteering, event sponsorships, and direct community investments. As part of our long-term commitment, Arevon allocates a portion of each project's capital cost to community benefits. To date, we have contributed more than $8 million in charitable giving in our project areas, supporting each community's unique goals and values.

Respecting Land

Our projects utilize the land responsibly to provide a reliable source of domestic energy, while preserving it for future options such as farming and preventing more permanent and intensive development. As a long-term owner and operator, Arevon is committed to respecting, safeguarding, and maintaining the land that supports our homegrown energy projects.

About Arevon

Arevon is a U.S. energy leader committed to powering America with affordable, reliable, and secure homegrown energy. Headquartered in Arizona, and with a regional office in New York, the company's experienced and dedicated team develops, finances, builds, owns, and operates renewable energy projects nationwide. With a strong track record in utility-scale solar and energy storage, Arevon is a trusted partner to utilities and businesses seeking cost-effective, sustainable energy solutions. By prioritizing American manufacturing and domestic energy production, the company invests in U.S. jobs, strengthens local economies, and advances the country's energy independence.
